

JQTABPANE -- start a JQuery tab pane

- Create nice looking horizontal tab panes in TWki topics. Write a sequence of %JQTAB{"..."}% and %JQENDTAB% pairs, and enclose them in %JQTABPANE% and %JQENDTABPANE%. Tab panes can be nested, e.g. within one tab you can add another tab pane. These variable are handled by the JQueryPlugin.
- Syntax: %JQTABPANE{ select="1" }% %JQTAB{"Tab 1"}% ... %JQENDTAB% %JQTAB{"Tab 2"}% ... %JQENDTAB% ... %JQENDTABPANE%
- Supported parameter:

Parameter:	Description:	Default:
select=""	Select a tab pane, default is the first tab.	"1"

- Note: A tab can be selected with a tab URL parameter using %JQTABPANE{ select="%URLPARAM{tab}%" }%
- Example:

```
%JQTABPANE%
%JQTAB{"Tab 1"}%
Tab 1 content...
%JQENDTAB%
%JQTAB{"Tab 2"}%
Tab 2 content...
%JQENDTAB%
%JQENDTABPANE%
```
- Renders as:

Tab 1

Tab 1 content...

Tab 2 Tab 2 content...
