Hierarchical Navigation

Navigation block that displays the current topic, its parent and children (if any).

This is intended to be included in other topics, for example in a side navigation bar (WebLeftBar).

NOTE: The lookup for parent and children will increase the loading time of your pages.

Usage

Two sections are defined:

- all
- children

Displaying the Parent - Current - Children block

```
%INCLUDE{"%SYSTEMWEB%.HierarchicalNavigation" section="all"}%
```

generates:

- WebHome
- HierarchicalNavigation
- HierarchicalNavigationChildExample

When included in WebLeftBar (using default Pattern skin) this is styled to:

- WebHome
- HierarchicalNavigation
- HierarchicalNavigationChildExample

Displaying child topics

```
*Child topics:*  
%INCLUDE{"%SYSTEMWEB%.HierarchicalNavigation" section="children"}%
```

generates:

Child topics:

- HierarchicalNavigationChildExample

When included in WebLeftBar (using default Pattern skin) this is styled to:

- HierarchicalNavigationChildExample

```
%STARTSECTION{name="all"}%<div class="twikiHierarchicalNavigation">
