

Sonia Haddad

is a full professor in Faculty of Sciences of Tunis (University of Tunis El Manar) and the Head of the Condensed Matter Physics laboratory. She completed her Ph.D in 2000 at the Faculty of Sciences of Tunis (FST) in Theoretical Solid State Physics under a co-supervision of Profs. M. Héritier (Paris-Sud University, Orsay) and Prof. C. Bourbonnais (University of Sherbrooke, Canada). She earned her Habilitation Universitaire (accreditation to supervise research in Physics) in 2008 from FST.

In 2011, She was a visiting scientist at Max Planck Institute for Complex Systems in Dresden (Germany) for two months. She was a Simons-ICTP associate from 2014 to 2019.

She is a theorist interested in strongly correlated electron systems and advanced materials, in particular superconductors, graphene-like materials, and topological matter.

She is also interested in Physics outreach and new methodology in teaching physics.
