\( \sqrt{s} = 7 \text{ TeV} \)

**ATLAS Preliminary**

- L1; 2010 data
- L1; minimum bias MC
- L2; 2010 data
- L2; minimum bias MC
- EF; 2010 data
- EF; minimum bias MC

**Axes:**
- Vertical axis: background efficiency
- Horizontal axis: offline \( E_T \) [GeV]

**Graph Details:**
- Data points for different conditions are plotted.
- The graph shows the relationship between background efficiency and offline \( E_T \) for the specified energy level.
