Acknowledgements

We would like to thank the technicians and the engineers who contributed to the design and construction of the prototypes, including U.Cornett, G.Falley, K.Gadow, P.Göttlicher, S.Karstensen and P.Smirnov. We also gratefully acknowledge the DESY and CERN managements for their support and hospitality, and their accelerator staff for the reliable and efficient beam operation. We would like to thank the HEP group of the University of Tsukuba for the loan of drift chambers for the DESY test beam. The authors would like to thank the RIMST (Zelenograd) group for their help and sensors manufacturing.
