ATLAS Post-doctoral position with Joint Consortium for Fundamental Physics in Hong Kong

The ATLAS group of the Joint Consortium for Fundamental Physics (JCFP) in Hong Kong invites applicants for an immediate opening for a post-doctoral position to work on the ATLAS experiment at the LHC. Members of the group are currently involved in studies of Higgs properties and Supersymmetry searches. Involvement in exotic searches is also planned. The JCFP team has also large commitments in the phase-I muon upgrade as well as in maintenance and development of the ATLAS muon software.

The successful candidate is expected to take a leading role in one or several of the areas listed above. A significant contribution to supervision and guidance of graduate and undergraduate students is also expected. The successful candidate will be employed by the JCFP through one of the member Universities. She/he will spend about 90% of her/his work time on-site at CERN. A competitive salary commensurate with qualification and experience will be provided. The position will be initially for three years, with a possibility of extension -subject to mutual agreement and budget constraints.

Applicants should send their CV, a statement of research interests and a full list of scientific publications to: hk-atlas@cern.ch

In the list of publications, applicants should identify up to 5 most relevant ones and provide a short description of their role. Applicants should further arrange for at least three recommendation letters to be sent to the email address above.

The screening of applications will start immediately and continue until the suitable candidate is identified. The JCFP thanks all the applicants for their interest, but advises that only shortlisted individuals will be notified of the result. For informal enquiries during the application process, please contact:

At CERN: Prof. K. Prokofiev (Kirill.Prokofiev@cern.ch) and Prof. Luis Flores-Castillo (Luis.Flores.Castillo@cern.ch).
In Hong Kong: Prof. M.C. Chu (mcchu@phy.cuhk.edu.hk) and Prof. Y. Tu (yanjuntu@hku.hk).

The JCFP is formed by members of Physics Departments in Hong Kong University (HKU), the Chinese University of Hong Kong (CUHK) and the Hong Kong University of Science and Technology (HKUST). The JCFP is strongly supported by the Hong Kong Research Grants Council.
