The University of Maryland High Energy Physics group (Professors Baden, Belloni, Eno, Hadley, and Skuja) is searching for a Postdoctoral Research Associate to work on the CMS experiment. Our group is strongly involved in the upgrades to the hadron calorimeter for future high luminosity runs of the LHC. The Maryland group is also involved in a wide range of physics activities, including searches for new particles and studies of multi-boson production. Preference will be given to candidates who can live in Maryland. The start date is 1 April 2015 or later.

Interested candidates should send a resume and arrange for three letters of recommendation to be sent to Dr. Sarah Eno at eno@umd.edu. Applications will be accepted until the position is filled. The University of Maryland is an equal opportunity employer.
