The Experimental High Energy Physics group at The Ohio State University is seeking an outstanding candidate to fill a postdoctoral position working on the CMS experiment at the Large Hadron Collider.

The Ohio State group is very active in data analyses, which include searches for new physics, and hardware projects, including the Phase 2 Track Trigger, pixel detector development, and muon detector electronics. Candidates should have a strong record of accomplishment in data analysis and experience or interest in trigger electronics.

Candidates for the position must have a Ph.D. in physics at the time of appointment. Candidates will be expected to help mentor graduate students and should have strong communication skills and potential for leadership.

Applicants are requested to e-mail their CV and a research statement to Prof. Brian Winer (winer.12@osu.edu). In addition, the applicants should arrange for at least three letters of reference to be sent to the same e-mail address.

Review of the applications will begin immediately and will continue until the position is filled.

The Ohio State University is committed to establishing a culturally and intellectually diverse environment, encouraging all members of our learning community to reach their full potential. We are responsive to dual-career families and strongly promote work-life balance to support our community members through a suite of institutionalized policies. We are an NSF Advance Institution and a member of the Ohio/Western Pennsylvania/West Virginia Higher Education Recruitment Consortium (HERC).

The Ohio State University is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation or identity, national origin, disability status, or protected veteran status.
