Post-doctoral Research Positions with Korean group of CMS

We invite applications to a postdoctoral research position for the Korea-CMS group. Korean group participating in CMS experiment at CERN consists of 81 members from 8 institutions. We participate in upgrade, maintenance and operation of the Resistive Plate Chamber (RPC) muon detector system and variety of physics analyses. At this time, Kyungpook National University will hire one person for the following tasks:

Kyungpook National University has 3 faculty members on CMS. You will be joining the group headed by Prof. Guinyun Kim for W/Z physics (Standard Model Physics), SUSY physics, and Tier 2 computing.

We are looking for a candidate who can take on a leading role in the ongoing activities, and physics analyses. Strong technical knowledge in software and analyses with demonstrated problem solving skills are desirable. Candidates must have a Ph.D. degree in experimental particle physics. Upon employment, the candidates are expected to be stationed at CERN full time. The salary is either 48,000 or 51,600 Swiss Francs per annum (depending on experience) while stationed at CERN, and is non-negotiable. The position is for two years with a possible extension of another two years upon mutual agreement.

Candidates should send a CV, list of publications, contact information of two or more references, and the ranked list of preferred institutions to the search committee, Prof. Intae Yu (intaeyu@skku.edu) and Prof. Guinyun Kim (gnkim@knu.ac.kr).

At this time, we ask the candidates not to have the reference letters sent to us. We will ask for reference letters once we have narrowed the list of possible candidates.

Deadline for application is June 30th.
