POSTDOCTORAL RESEARCH POSITION ON CMS NORTHWESTERN UNIVERSITY

The Particle Physics Group at Northwestern University invites applications for a postdoctoral research position on the Compact Muon Solenoid (CMS) experiment at the CERN LHC. Our group is working on the beam protections system and luminosity, endcap muon detector, tracker based trigger upgrade and hadronic calorimeter and global event description software. We are experts on electroweak physics, Higgs boson physics, and searches for new physics. The position is open immediately.

The group is looking for an outstanding applicant who has obtained, or is about to obtain, a Ph.D. in Experimental Particle Physics. Applicants should submit a CV, a list of publications to which he or she made a specific contribution, and a statement of research interests. Please arrange for two letters of recommendation to be sent. All materials should be sent by email:

hep-exp2011@lotus.phys.northwestern.edu

Review of applications will take place as they are received, and the position will remain open until filled. Requests for further information should be sent to the email address above.

Northwestern University is an Equal Opportunity/Affirmative Action Employer. Women and minority candidates are urged to apply.
