NORTHWESTERN UNIVERSITY, POSTDOCTORAL SCHOLAR POSITIONS
EXPERIMENTAL HIGH ENERGY PHYSICS

The Northwestern University invites applications for a postdoctoral research position to work on the CMS experiment at the Large Hadron Collider (LHC) at CERN, starting immediately. The successful applicant will be expected to make significant personal contributions to the CMS physics analyses as well as sharing responsibilities in the operation of the CMS detector. The position will be based in Evanston, IL, although travel to CERN for a number of short trips per year and/or extended periods of time during the data taking are expected.

The group is looking for outstanding applicants who have obtained, or are about to obtain, a Ph.D. in Experimental Particle Physics.

The appointment is made for an initial period of two years and renewable annually for a period of up to 4-6 years, subject to mutual satisfaction. Enquiries concerning the position can be made to Prof. Mayda M. Velasco (mvelasco@lotus.phys.northwestern.edu).

Applicants should send a curriculum vita, statement of research interests, list of publications, and arrange for three letters of recommendation. Electronic application materials and letters of reference in PDF format are preferred. Application materials should sent to: hep-exp-2011@lotus.phys.northwestern.edu

Review of applications will begin May 1, 2012, and will continue until the position is filled.
