Junior Faculty Position  (A13Z)

The Experimental Particle Physics group (Prof. K. Jakobs) at the University of Freiburg has an opening for a

Junior Faculty Position  (Akademische/r Rätin/Rat A13Z)

starting on 1st November 2012.

The successful candidate is expected to participate in the ATLAS experiment at the Large Hadron Collider. The group is engaged in data analysis, in the operation of the ATLAS semiconductor tracker (SCT) and in upgrade projects on silicon detectors. The analysis activities are focussed on Higgs boson physics and on the search for supersymmetry.

The position is initially limited to three years with the possibility of renewal up to a total of six years. It includes teaching duties and offers the possibility to acquire a Habilitation.

To qualify, candidates should have a PhD in Experimental Particle Physics and should have demonstrated strong potential for outstanding achievements as independent researchers. The successful candidate is expected to take a leading role in Higgs boson physics over the forthcoming years. Engagements in the SCT operation and/or upgrade activities are encouraged. The university is seeking to increase the number of female scientists and therefore encourages suitably qualified women to apply.

Applications including a CV, a short description of the research experience and interests should be sent via email until 7. September 2012 to:

Prof. Karl Jakobs, Universität Freiburg
Hermann-Herder-Str. 3, D-79104 Freiburg / Germany
email: karl.jakobs@uni-freiburg.de

In addition, the applicants should arrange for three letters of reference to be sent via email by 15. September 2012.
