LIP-Lisbon invites applications for a postdoctoral research position in the CMS experiment at CERN LHC. The prime focus of the position is on Higgs physics.

The LIP/CMS group is active in top, Higgs, SUSY, b and quarkonia physics and rare decay searches, exploiting both the energy and luminosity frontiers offered by the LHC. The group has important responsibilities in the operation, monitoring and upgrade of the CMS ECAL and CTPPS detectors.

The position is based in Lisbon. Qualifications required include a PhD in experimental particle physics and a clear demonstration of the ability to carry out a research program.

The search will continue until the position is filled. Applicants should submit a curriculum vitae, statement of physics interests, and arrange for three letters of recommendation to be sent to:
Natalia Antunes
Email: natalia@lip.pt
