The experimental High Energy Physics group at The Ohio State University invites applications for a postdoctoral researcher working on the CMS experiment at the LHC. The CMS group at OSU is led by Professors Durkin, Hill, Hughes and Winer and is actively engaged in data analysis involving the study of the Higgs boson and the search for physics beyond the Standard Model. In addition, the group is involved in detector upgrade projects, including the Level-1 trigger system. The candidate will be expected to take on a leadership role in data analysis and the commissioning and operation of the upgraded Level-1 trigger system at CMS.

Candidates must possess a Ph.D. in experimental particle physics. Applicants should send a CV, a short research statement, and arrange for three letters of recommendation sent via e-mail to winer@physics.osu.edu. For full consideration applications should be received by May 1st.

The Ohio State University is an EEO/AA employer. To build a diverse workforce Ohio State encourages applications from individuals with disabilities, minorities, veterans, and women. Ohio State is an NSF Advance Institution.
