EMI Timelines

EMI Maintenance Schedule

EUROPEAN MIDDLEWARE INITIATIVE

Release	Code Name	Release Date	End of Full Support	End of Standard Updates	End of Security Updates and Support
EMI 1	Kebnekaise	May 12, 2011	April 30, 2012	October 31, 2012	April 30, 2013
EMI 2	Matterhorn	May 21, 2012	April 30, 2013	October 31, 2013*	April 30, 2014*
EMI 3	Monte Bianco	February 28, 2013	April 30, 2014*	October 31, 2014	April 30, 2015*

Full maintenance period – 12 months

- Correct issues in the code and provide new features

Standard maintenance period – 6 months

- Correct issues in the code, but no new feature is introduced

Security updates period – 6 months

- Are provided only updates targeting security vulnerabilities

End-of-life period:

- no updates or support is provided any more

- EMI 2 released 21st May, 2012
 - 2nd snapshot, ending point of a year of development, certification and release cycles
 - 56 products
 - Full support for SL5 and SL6, partial Debian6 support
 - 454 (SL5), 447 (SL6)
 - 60 (Deb6) packages

■ Major ■ Minor ■ Revision ■ Repackage

- 5 new products:
 - CANL, EMIR, EMI-Nagios, Pseudonymity, WNoDeS
- Not released: Hydra, WMS
- OTHER EMI 2 Highlights (??) – Glue 2, EMI ES, ARGUS integration...
- Backward incompatible changes:
 - ARC:
 - *Compatibility of ARC WS endpoints with older ARC 11.05 clients that relied on incomplete GLUE2 to communicate to pre-production WS endpoints are broken due to the more compliant GLUE2 LDAP and XML rendering introduced in this release. Upgrade to new ARC 12.05 Clients is highly recommended.*
 - *No backward incompatibility is introduced w.r.t. the production gridftp interface.*
 - WMS-cli:
 - *Removed unused command-line options (--default-jdl, --output*

- Continue supporting 1 update cycle/month
 - Include all products updates, EMI 1 & EMI 2
 - First cycle: 02 July – 12 July
- UI/WN tarballs
 - Release them in the next update
- Debian support
 - Make available at least all clients by End of Oct.

Planned Future Updates

- **BDII top, v. 1.0.2 ([EMI1](#) & [EMI2](#))** – revision releases
 - Update FCR mechanism to work with the new SAM interface.
 - Fixed wrong location of top-urls.conf file.
 - Randomise glite-info-update-endpoints cron job.
- **BLAH, [v. 1.16.6](#) (EMI1) & [v. 1.18.1](#) (EMI2)** – revision releases
 - fixing a problem with LSF BUUpdater causing wrongly reported IDLE state jobs
- **[DPM](#) / [LFC](#), v. 1.8.4 (EMI2)** – minor releases
 - New features:
 - *dpm-replicate should also handle directories & take into account filesystem on the same server*
 - *Store GUIDs in DPM*
 - *should-start / required-start of service daemons*
 - *possibility to limit the number of concurrent transfers in dpm*
 - *publication of version and distribution version along with glue2*
 - *improved logging of missed mappings*
 - *Administration tools*

Planned Future Updates (cont.)

- **GFAL/lcg_util, v. 1.12.0 (EMI1)** – repackaged release
 - SL5/i386
- **GFAL/lcg_util, v. 1.13.0 (EMI2)** – minor release
 - Delivers GFAL2 2.0.0 (first official version)
 - SL5 & SL6/i386
 - Bugfixes
- **VOMS Oracle plugin, v. 3.1.15 (EMI1)**– revision release
 - Fixes crashes of middleman process (Oracle backend)
- **VOMS-admin, v. 2.7.0 (EMI1)** – minor release
 - Fixes a bug preventing the correct sending of warning emails to the VO managers before the users membership expiration date
 - new features:
 - *New views to easily access expired and suspended users*
 - *configurable grace period before suspending expired users*
 - *default Sign AUP grace period has been extended from one day to 7 days*

- **WMS, [v.3.3.6](#) (EMI1)** – revision release
 - Fixing:
 - *Broken submission to ARC*
 - *Condor gridmanager keeps crashing on wrong assertions about some ldap attributes ordering*
 - *EMI-1 WMS does not propagate user job exit code*
 - *some sensible information should be logged on syslog*
- **WMS, [v. 3.4](#) (EMI2)** – major release

Thank you
