MILESTONE REPORT

EMI has successfully passed its first periodic review on June 22nd, 2011. The review was held at the EC offices in Brussels. The agenda of the review can be found at:

<https://indico.cern.ch/conferenceDisplay.py?confId=146274>

The final review report was received on August 2nd, 2011. The EMI project has been rated as

“Good progress (the project has achieved most of its objectives and technical goals for the period with relatively minor deviations).”

The reviewers have provided input on the work performed during the first year and 14 recommendations for the following periods. The EMI project is currently in the process of implementing the recommendations. A preliminary reply will be sent to the EC by end of October 2011 and a full report will be presented at the next periodic review.
