

# EUROPEAN MIDDLEWARE INITIATIVE

## MSA1.2.3 - EMI REFERENCE RELEASES

### EU DELIVERABLE: MS20

---

Document identifier:	EMI-MSA1.2.3-1277548-EMI_Reference_Releases-v1.0.docx
Date:	30/04/2012
Activity:	SA1
Lead Partner:	INFN
Document status:	Final
Document link:	<a href="https://cdsweb.cern.ch/record/1277548">https://cdsweb.cern.ch/record/1277548</a>

---

## I. DELIVERY SLIP

	Name	Partner/Activity	Date
From	Cristina Aiftimiei	INFN/SA1	05/25/2012
Approved by	PEB	-	25/05/2012

## II. DOCUMENT LOG

Issue	Date	Comment	Author/Partner
1	05/21/2012	Milestone has been achieved.	Cristina Aiftimiei/INFN
2	05/25/2012	v1.0 PEB approved version	PEB

## III. DOCUMENT CHANGE RECORD

Issue	Item	Reason for Change
1		
2		

## IV. DOCUMENT AMENDMENT PROCEDURE

This document can be amended by the authors further to any feedback from other teams or people. Minor changes, such as spelling corrections, content formatting or minor text re-organization not affecting the content and meaning of the document can be applied by the authors without peer review. Other changes must be submitted for peer review and to the EMI PEB for approval.

When the document is modified for any reason, its version number shall be incremented accordingly. The document version number shall follow the standard EMI conventions for document versioning. The document shall be maintained in the CERN CDS repository and be made accessible through the OpenAIRE portal.

## V. GLOSSARY

The complete EMI glossary is available at <https://twiki.cern.ch/twiki/bin/view/EMI/EmiGlossary> .

## VI. COPYRIGHT NOTICE

## MILESTONE REPORT

EMI plans to have a baseline reference release per year to introduce the major functionality changes and improvements foreseen by the EMI Technical Development Plans [R1, R2].

The EMI 2 (Matterhorn) release provides many new features and enhancements for several middleware components from ARC, dCache, gLite and UNICORE, including important new services not previously released in EMI 1. The new functionality includes:

- a new common Service Registry Service (EMIR),
- the Worker Nodes on Demand Service (WNoDeS),
- Nagios probes for the majority of the services,
- better integration of the Argus authorization framework with many services
- initial implementation of the common EMI Execution Service interface.

All released services are available for the Scientific Linux 5 64 bit and Scientific Linux 6 64 bit platforms. A subset of EMI 2 services is also available for the Debian 6 64bit platforms and more will be released in the near future.

The EMI 2 activity is described in detail into a dedicated twiki page [R3] containing information on:

- EMI 2 Schedule with dates for each release candidate (RC<sub>x</sub>, x={1,2,3,4}) code freeze,
- certification, deployment on the EMI testbed, QC verification
- Components Releases tasks status
- EMI 2 general policies – containing information on the release process for the first EMI release
- Supported platforms
- ETICS EMI-project configurations containing:
  - definition of each release candidate step;
  - nightly-builds schedule and results
  - threshold for the successful build rate of each release candidate
- Acceptance Criteria for judging the inclusion or exclusion of a product in the EMI 2 release
- ETICS-configuration schedule

The EMI EMT twiki page [R4] contains, not only links to the EMT meetings and corresponding minutes, but also links to general EMI documentation like:

- Generic Installation & Configuration for EMI 2 [R5]
- EMI package signing procedure [R6]

The operational and infrastructural resources used consist of:

- Infrastructural resource:
  - Build & Test System, <https://etics.cern.ch/>, with 4 platforms, from which 2 new (SL6 and Debian6) and Worker Nodes, sl5\_x86\_64\_gcc412EPEL, sl5\_ia32\_gcc412EPEL, sl6\_x86\_64\_gcc446EPEL and deb6\_x86\_64\_gcc445
  - Repositories:
    - AFS:
      - /afs/cern.ch/project/emi/repository/dist/EMI/2/{RC1,RC2,RC3,RC4,sl5,sl6}/{SRPMS,i386,x86\_64,tgz}/{base, updates, third-party}
      - /afs/cern.ch/project/emi/repository/dist/EMI/2/debian/dists/{squeeze,squeeze-updates}/{main,third-party}/{binary-amd64,source}
    - YUM/APT repository based on AFS and HTTPD services provided by CERN: <http://emisoft.web.cern.ch/emisoft/dist/EMI/2>
- Operational Resources:
  - Weekly EMT phone-conferences:
    - Agendas: <http://indico.cern.ch/categoryDisplay.py?categId=3077>
    - Audio & video conference tool: EVO (<http://evo.caltech.edu/evoGate/>), under the dedicated EMI community
  - EMT mailing list: <http://mail.eu-emi.eu/mailman/private/emt/>
  - EMT actions tracking tool:
    - <https://savannah.cern.ch/task/?group=emi-emt>
  - EMT Releases tracking tool
    - <https://savannah.cern.ch/projects/emi-releases>

The EMI 2 Release was announced on 21.05.2011 through:

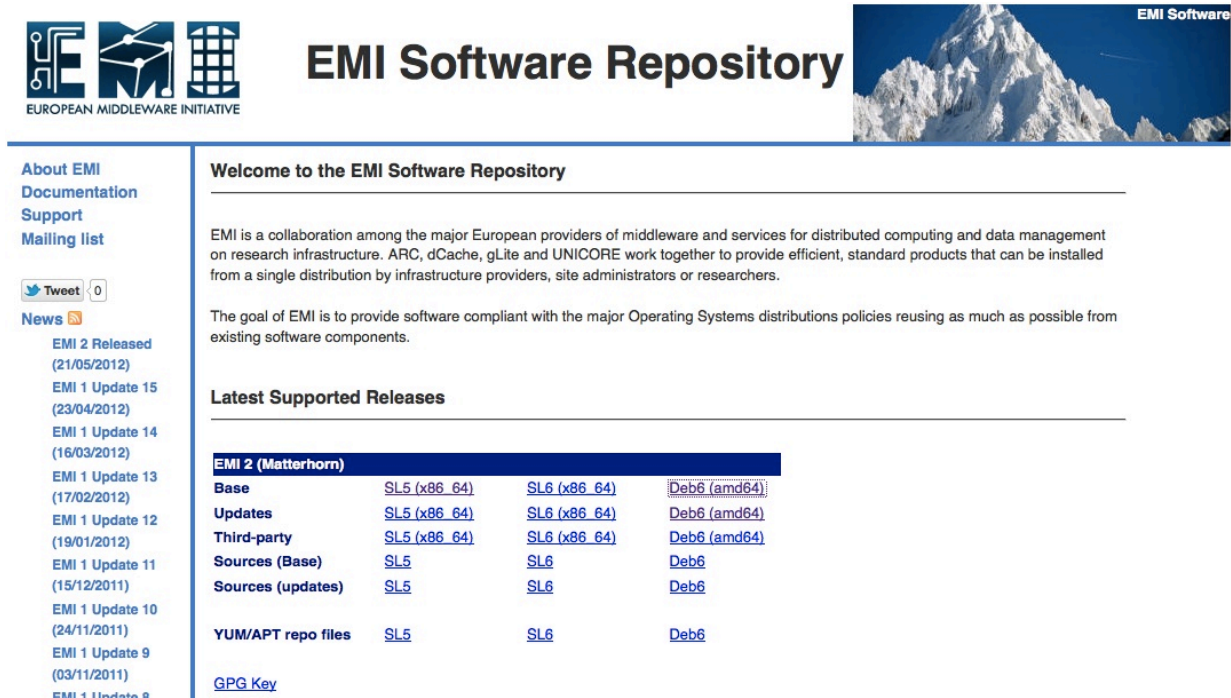

- emi-announce mailing list [R7]
- RSS-feed on the EMI public web page [R8]

EMI 2 artefacts are available on the EMI public repository [R9]; it contains

- 56 Products from ARC, dCache, gLite, UNICORE
- 454 (SL5), 447 (SL6), 60 (Deb6) EMI packages
- 37 (SL5), 28 (SL6), 18 (Deb6) external dependencies managed by EMI

- 100% of RPMS
- 99% of SRPMS

See Figure 1 EMI 2 repository view.

**Figure 1: EMI 2 Repository View**

The milestone was planned for the end of April 2012. The slight delay in delivering the EMI 2 release was mainly due to the late achievement of the initial release candidate (RC1), which in turn resulted in the delay in the steps that followed - deployment on the EMI integration testbed, verification, preparation of the repository and EMI 2 public pages.

The unavailability of test and certification reports was the main reason for the exclusion of HYDRA, WMS products from the EMI 2 release. These products will be released as soon as their testing will be concluded successfully and adequate reports become available. DelegationJava and Trustmanager products are two of the products that given the critical nature of their functionality, used by many of the other EMI products, like ARGUS, CREAM, FTS, L&B, Pseudonymity), were included, exceptionally, in the EMI 2 release even if these have failed a number of acceptance criteria e.g. inadequate documentation, no certification reports. The gLite Security PT is working towards full compliance at the time of this writing. The Debian 6 porting activity was also started but was completed only for a limited number of products in time for the EMI 2 Matterhorn release (ARC, UNICORE, CANL, Gridsite). The main reasons for this were the lack of expertise of most PTs with this platform and the lack of prioritization of this activity when compared to other development, maintenance and support activities. The late integration of Debian 6 support in the ETICS build system, a task that showed to be more complex than anticipated, concurred in delaying the Debian 6 porting activity.

Technical details can be found at the dedicated “EMI 2 Activity” twiki page [R3] used to share important information with all developers and keep every project member updated on the EMI 1 procedures, status, achievements, and issues.

**Annex A** contains the acceptance criteria status table with the main reasons for the failing components. Both annexes contain data as of 18.05.2012.

**Annex B** has the list of EMI 2 produced artefacts and their build status.

## ANNEX A: EMI 2 – ACCEPTANCE CRITERIA STATUS

The acceptance criteria are the conditions by which a Product is considered ready or not for inclusion in an EMI release. The criteria can be "exclusive" or "inclusive". Failing an exclusive criterion causes exclusion from the release, failing an inclusive criterion doesn't cause exclusion from the release, but the Product is marked as not fully compliant with the release criteria. The exclusive criteria are marked in **gray** in the table. Refer to the legend for an explanation of the color-coding.

<b>GREEN</b>	OK
<b>YELLOW</b>	Failed, but an alternative exists (for example documentation is not PDF, but another usable format is provided as a temporary workaround)
<b>RED</b>	Failed
