Preparation of the Cool-Down in Sector 78, 81 and 45.

Sector 78

The status of the Cool-Down reported by F.Millet is:

- The flushing started on Thu Dec 21 in the QRL; it is ongoing today.
- Tonight will start the flushing of the DFBs and then of the magnets.
- On Friday the flushing should be finished and the ElQA-TP4B will take place.
- 2 plugs have been found in the 3 DFBs checked; 3 more DFBs need this check.
- There is the need for valves software control check (as some errors have been found in the past).
- 3 BLMs need re-installation. E.Barbero and P.Cruikshank said that there is no hurry as this work can be done during powering.
- F.Millet suggests performing an interlock test (vacuum loss leading to a cryo-stop) on Wednesday with all the system connected for cool-down and the equipments responsible agree (P.Cruikshank, P.Gomes, W.Maan, F.Millet).

J.C.Guillaume reported on his activity:

- The warm magnets cables will be ready this week on the magnet side (LSS8L).
- One cryo-instrumentation cable may need to be changed: this need to be organized by tomorrow morning.

R.Denz reported on his activity:

- Data recording is taking place in the QPS systems.
- 2 QPS cables need repair. The action has been discussed after the RAT between R.Saban, D.Tommasini.
D. Bozzini reported on his activity:

- EIQA-DOC is ongoing and need to be coordinated with the flushing.
- For the EIQA-TP4B (1.9kV) everything need to be connected by Friday morning.
- The clamps to avoid the freezing of the current leads are being placed.
- The wrong pinout is being changed and the database updated by J.C.Guillaume.

Warm Magnets Commissioning:

- A. Vergara reported that the warm magnets will be commissioned starting tomorrow afternoon. M.Kappinen will perform the EIQA and M.Coccoli will ensure the safety information banners.

**Sector 81 and Sector 45**

The status of the LHCf and BRAN reported by D. Macina is:

- This week is consecrated to test in surface buildings.
- The main part of the equipment will arrive before the end of this week 2 and the transport of the LHCf detector in the LSS1L will be done on Friday 15th January affecting the access conditions. The BRAN will probably be transported on the 16th Jan.

The status of the Warm Magnet commissioning reported by A. Vergara is:

- Week 2 and 3 will be consecrated to the preparation, while the heat run will be performed during week 4.
- J.C.Guillaume asks for the consignation of the *gaine monorail* during the warm magnet cabling and it is agreed that it will be asked to J.M.Chevalley to have longer term consignations in sect 78, 81, 45 in the LSS regions. J.C.Guillaume asked for the **consignation** of the Power Converters as well.

AC cabling:

- Installation of the cryo-instrumentation crates in sector 81 will be finished by the end of January, while in sector 45 it will be done at the beginning of February.

QPS:

- QPS tests will start this week in sector 45 in DFBAs.
