

## LHCb\_USER Space Token Requirements

For the May phase of CCRC08, there is a requirement to make use of the LHCb\_USER space token in SRM; this is a “tape 0-disk 1” storage class. The space requirement given by site is given in Table 1.

**Table 1: May CCRC08 requirements**

Site	Storage requirement (TB)
CERN	3.3
FZK	1.3
IN2P3	2.9
CNAF	1.1
NIKHEF	3.0
PIC	0.5
RAL	1.3

The requirements estimated for data taking are given in Table 2. It is hoped this can be made available by the end of June.

**Table 2: Data taking requirements**

Site	Storage requirement (TB)
CERN	26.4
FZK	6.7
IN2P3	15.6
CNAF	5.9
NIKHEF	16.2
PIC	2.7
RAL	6.7
