

# THE IMPORTANCE OF BEING A PHD

- The PhD is a professional experience!
- You can do many things and **you are not afraid to learn.**
- But be **determined**: finding a job takes time and effort.
- Talk to people, do **networking**.
- **One page CV, key-words depending on the position you are applying to:**
  - *Computing, physics, team work, analysis, statistics, algorithm, numerical, international, high performance, development, grid, quality, English, Python, C++, teaching, project management, communication...*
- **Prepare the interviews, find you best qualities, know what you want to say.**
  - And do some reading about the company you are applying to!
- **Be positive**, value your thesis experience, but be humble.
- **Explain your decision as natural, in an appealing way :)**
