

Minutes of the LIM meeting, Jan 26, 2006

Present: Emil Obreshkov (ATLAS), Florence Ranjard (LHCb),
Andreas Pfeiffer (SPI)

Apologies: Vasily Kabachenko (ATLAS), David Quarrie (ATLAS), Stefano Argiro (CMS),
Shahzad Muzaffar (CMS)

Actions:

A new set of releases based on LCG_41 is in preparation. This configuration has the latest release of ROOT (5.08.00b) and new versions of Xerces-C (2.7.0), sqlite (3.2.8) and lfc (1.4.1). The main changes for the projects are the move of the reflex package from seal to root and the migration of the dictionaries from seal to a new project "RELAX". For details on the version numbers, see the Proposed changes for configuration LCG_41 (<https://uimon.cern.ch/twiki/bin/view/SPI/ProposedConfigChanges41>) page in the SPI wiki pages or view the configuration at: <http://spi.cern.ch/config/viewConfig.html>

The tarballs for binaries for win32_vc71 platform are done for the LCG_40a and LCG_41 configurations. Work has started to integrate this into the standard post-build procedures for the projects.

New issues:

None.

Next meeting: Jan. 26, 2006, 11:00.

Action items:

new and outstanding:

- * gccxml-config to report the patch level
- * cernlib for amd64/gcc344 available ?
- * check/validate the directory structure of all LCG AA projects (checkout and install area)
- * create "LCGAA" pseudo-package for lcg-installation-manager.py to download the binaries of a related set of releases in one go.
