

Minutes of the LIM meeting, Mar 23, 2006

Present: Emil Obreshkov (ATLAS), Florence Ranjard (LHCb), Stefano Argiro (CMS),
Shahzad Muzaffar (CMS), Andreas Pfeiffer (SPI)

Apologies: Vasily Kabachenko (ATLAS), David Quarrie (ATLAS),

Actions:

A new configuration (LCG_42) was released with root 5.10.00a, SEAL 1.8.1, RELAX 1.0.0, CORAL 1.3.0, POOL 2.4.0 and COOL 1.2.9. A new bug-fix release of root (5.10.00b) is in preparation, this will be integrated into a new configuration (LCG_42a) once it's out (together with a bug fix for CORAL (1.3.1)).

Porting to SLC4 has started, there were some small problems with the AFS areas (frozen/replicated directories and volumes), but no major problems were seen. The compiler version was upgraded a few weeks ago, and it was decided to update the platform naming accordingly to slc4_ia32_gcc345 (and slc4_amd64_gcc345). Also future updates will be treated as new platforms and s/w will be recompiled for the new platforms once the compiler has changed (for new releases after the update).

New issues:

No new issues came up.

Next meeting: Apr 6, 2006, 11:00.

Action items:

new and outstanding:

- * porting to SLC4 (ia32/amd64)
- * gccxml-config to report the patch level
- * create "LCGAA" pseudo-package for lcg-installation-manager.py to download the binaries of a related set of releases in one go.
