

Minutes of the LIM meeting, May 4, 2006

Present: Florence Ranjard (LHCb), Stefano Argiro (CMS),
Andreas Pfeiffer (SPI)

Apologies: Emil Obreshkov (ATLAS), Vasily Kabachenko (ATLAS), David Quarrie (ATLAS),

Actions:

The configurations LCG_43a and LCG_44 are in preparation. An issue was reported by Atlas concerning the fact that root is presently built with it's own version of pcre (and the build is using the static pcre lib). In future builds this will be changed such that root is using the pcre shared lib provided in AFS external.

It is planned that the LCG_44 configuration will be ported to the new SLC4 platforms: slc4_ia32_gcc345 and slc4_amd64_gcc345.

New issues:

No new issues were raised.

Next meeting: June 1, 2006, 11:00.

Action items:

new and outstanding:

- * porting to SLC4 (ia32/amd64): needs builds/porting of CORAL, POOL, COOL
- * gccxml-config to report the patch level
- * create "LCGAA" pseudo-package for lcg-installation-manager.py to download the binaries of a related set of releases in one go.
