

Minutes of the LIM meeting, June 29, 2006

Present: Florence Ranjard (LHCb), Emil Obreshkov (ATLAS),
Andreas Pfeiffer (SPI)

Apologies: Vasily Kabachenko (ATLAS), David Quarrie (ATLAS), Stefano Argiro (CMS),

Actions:

Configuration LCG_45 was released and announced to the public on June 26. There was some delay introduced by bug-fixes which took longer than expected. Also a power cut in the computer centre caused some delay as one of the machines used for the builds (lxcert-amd64) did not restart properly and the build took more than 18 hours (instead of one).

Preparations for the EuroPython 2006 conference which will take place next week (July 3-5) at CERN are ongoing and take some of the resources of SPI.

New issues:

AP to check the versions of RELAX and COOL in LCGCMT_45 (*the versions have been updated to RELAX 1.1.1a and COOL 1.3.2b*).

Also the version of root in LCGCMT_44 will be checked (*the version is correctly 5.11.02 so a new version LCGCMT_44a with root 5.11.04 will be created*).

Next meeting: July 13, 2006, 11:00.

Action items:

new and outstanding:

- * prepare and circulate list of all external packages for review
- * fix cernlib tarball
- * gccxml-config to report the patch level
- * create "LCGAA" pseudo-package for lcg-installation-manager.py to download the binaries of a related set of releases in one go.
