

Minutes of the LIM meeting, Oct 19, 2006

Present: Florence Ranjard (LHCb),
Andreas Pfeiffer (SPI)

Apologies: Vasily Kabachenko (ATLAS), David Quarrie (ATLAS),
Stefano Argiro (CMS), Emil Obreshkov (ATLAS),

Actions:

Configuration LCG_47b with some fixes in ROOT (now version 5.13.04a) is just finished, announcement will come today. A new version of RELAX (1.1.4) and rebuild releases for POOL (2.4.7a) and COOL (1.3.3b) are included.

LCG_48 with a new version of SEAL (1.9.0) (including the change in the macros (removal of trailing ";") requested by CMS, the fixes for bugs found by COOL and the fixes for porting to osx104_ppc_gcc401) is in preparation (SEAL 1.9.0 is build, the other projects are building) and is planned to come out this week. This version is also build on the osx104_ppc_gcc401 platform.

Porting of SEAL to build with CMT on all platforms is ongoing, this is the "prototype exercise" to move all the projects to build with CMT. Some issues were found which need changes, both in the cmt configuration of seal and in lcgcmnt).

New issues:

No new issues were reported.

Next meeting: Oct 19, 2006, 11:00.

Action items:

new and outstanding:

- * set up web page to request creation of binaries for configuration/platforms
- * check lcg-installation-manager.py to download each package only once.
- * prepare and circulate list of all external packages for review
- * create "LCGAA" pseudo-package for lcg-installation-manager.py to download the binaries of a related set of releases in one go.
