

## Minutes of the LIM meeting, Nov 16, 2006

Present: Florence Ranjard (LHCb), Emil Obreshkov (ATLAS),  
Shahzad Muzaffar (CMS), Andreas Pfeiffer (SPI)

Apologies: Vasily Kabachenko (ATLAS), David Quarrie (ATLAS),  
Stefano Argiro (CMS),

### Actions:

-----

Configuration LCG\_48 was released two weeks ago as planned. A bug fix version of ROOT (5.13.04c) is being prepared, planned to be released this week or early next week. This version will contain fixes in Reflex (transparent for the projects) and in MathLib (changes in the API). A new configuration will be prepared (LCG\_48a) with this release and an updated RELAX version.

Work on setting up a nightly build system for LCG AA projects is continuing. SEAL, RELAX, and CORAL are now ported to build with CMT, COOL and POOL will follow soon.

The broken Rfio plugins of root on SLC4 have been fixed and are reinstalled. The problem was caused by missing symlinks in the castor installation for slc4\_\*\_gcc34 (now set). The Castor team has been informed of the change of platform names.

### New issues:

-----

CMS asked if it would be possible to insert the scram v1 BuildFiles into the projects once the move to CMT is done (replacing the old scram v0 ones). This will be discussed with Pere and the projects.

LHCb asked to have the individual tarballs built for GENSER 1.4.0 on the slc4\_ia32\_gcc323 platform.

Next meeting: Nov 30, 2006, 11:00.

-----

### Action items:

new and outstanding:

- \* set up web page to request creation of binaries for configuration/platforms
- \* check lcg-installation-manager.py to download each package only once.
- \* prepare and circulate list of all external packages for review
- \* create "LCGAA" pseudo-package for lcg-installation-manager.py to download the binaries of a related set of releases in one go.
