

## Minutes of the LIM meeting, Nov 30, 2006

Present: Emil Obreshkov (ATLAS),  
Andreas Pfeiffer (SPI)

Apologies: Vasily Kabachenko (ATLAS), David Quarrie (ATLAS),  
Shahzad Muzaffar (CMS), Stefano Argiro (CMS),  
Florence Ranjard (LHCb),

Actions:

-----

The individual tarballs built for GENSER 1.4.0 on the slc4\_ia32\_gcc323 platform are installed. This was requested by LHCb.

Configuration LCG\_48a was released last week, including a bug fix version of ROOT (5.13.04c) and a rebuild-release of Reflex (transparent for the projects) for the changes in MathLib. Also, new versions of Castor (2.1.1-9), dcache\_client (1.7.0.16) were introduced, together with some bug fixes in CORAL (1.6.2).

Work on setting up a nightly build system for LCG AA projects is continuing. All projects now are build (except the tests of POOL), running (and checking) of the tests is presently under preparation. A wiki page with instructions is being set up at:

<https://twiki.cern.ch/twiki/bin/view/SPI/SpiNightlyBuilds>

New issues:

-----

Atlas is asking about the status of the compat32 package in AFS external. To be set up.

Next meeting: Dec 14, 2006, 11:00.

-----

Action items:

new and outstanding:

- \* discuss with Pere and the projects the "insertion" of scram-v1 buildfiles once the move to CMT is done. (Maintained by CMS members in the projects)
- \* set up web page to request creation of binaries for configuration/platforms
- \* check lcg-installation-manager.py to download each package only once.
- \* prepare and circulate list of all external packages for review
- \* create "LCGAA" pseudo-package for lcg-installation-manager.py to download the binaries of a related set of releases in one go.
